

Esker demonstrates how to strengthen Companies' Accounting Processes and achieve financial quick wins

Derby, UK — June 11, 2013 — [Esker](#), a worldwide leader in [document process automation solutions](#) and [SAP](#)® software solution and technology partner, is proud to announce their forthcoming Finance Improvement Briefing event, which will take place on Tuesday 2nd July 2013 at Manchester Town Hall.

The briefing, entitled 'Ideas to strengthen accounting processes with document automation', will reveal how [Accounts Receivable](#) and [Accounts Payable](#) processes can be improved by document automation, and how companies can benefit from financial quick wins – which can provide significant advantages in the current economic climate, where businesses are under pressure to reduce cost bases and deliver revenue objectives.

A number of industry experts will cover key topics that highlight the challenges facing companies' financial operations and bottom line costs today. The programme will include the following speakers:

- Tony Nisbett, Vice President of Partner Relations at TrustWeaver - a leading provider of cloud-based information compliance and governance solutions: Tony will present the latest information on Tax-compliant global electronic invoice management, and explain the benefits of secure and legal invoicing.
- Stephen Wynne-Jones, Technical Director at Esker: Stephen will demonstrate how to improve the Accounts Receivable process by automating the delivery and archiving of both electronic and paper-based invoices; he will also highlight the advantages that businesses can benefit from, such as error reduction and improved customer service.
- In a separate demonstration, Stephen will show how to make paper-free Accounts Payable a reality and how this can: cut operational and administrative costs by 40 – 60%; enhance productivity, leverage early-payment discounts; provide other, numerous, tangible business benefits.
- Alyson Moultrie, Partner Manager, PFU Fujitsu: Alyson will present 'Simple scanning for Accounts Payable', which will cover: imaging technologies; document integrity; and how this technology meets customers' demands and improves workflow.

Alistair Nicholas, MD of Esker Northern Europe said: “We’re delighted to be holding this event, and to be partnering with TrustWeaver and PFU Fujitsu. Together we aim to deliver an informative programme that helps answer the challenges faced by financial departments today, and to highlight the benefits that our technologies can jointly deliver.”

Alistair continued: “In light of the difficulties that businesses continue to face in the current economic climate, it is important to ensure that companies are aware of the latest technology to help improve the way that they do business with their customers, whilst also being able to make significant cost and time savings. Our aim is to help organisations reduce the inefficiencies caused by a dependence on paper, and reduce the negative impact of ineffective document processing.

In today’s climate, businesses are under much more pressure to eliminate non-value added activities and improve core business processes which, when efficiently streamlined, can unlock the potential to reduce cost bases and improve operational efficiencies.”

“We look forward to welcoming our delegates to this exciting event, and demonstrating how to harness document automation technologies in order to extend productivity gains.” concluded Alistair Nicholas.
