

Page Personnel France Automates the Processing and Sending of Postal Mail via Esker Mail Services

Derby, UK — February 6, 2014 — [Esker](#), a worldwide leader in [document process automation solutions](#), and [SAP®](#) software solution and technology partner, announced today it has been selected by Page Personnel France, a subsidiary of [PageGroup](#), a leading specialist in recruitment consultancy, to manage the sending of its Human Resources documents via the [Esker Mail Services](#) solution. By automating the processing and sending of postal mail in the cloud, Page Personnel has not only made significant gains in productivity, its teams are now able to oversee and manage a larger number of temps.

Given the nature of its recruitment business, Page Personnel France sends high volumes of standard and registered mail containing confidential documents such as identity verifications and work contracts. Previously, document sending was done internally using traditional manual processing methods. Page Personnel France had prior success implementing the [Esker Cloud Fax Services](#) solution, which prompted them to approach Esker about automating and outsourcing the sending of six different types of documents by standard and registered mail:

- Medical visit convocations
- Residency permit verifications
- Customer contract reminders
- End of contract notifications
- Invoices
- Pay slips

“Esker is able to support our complex requirements for document sending while respecting the confidential nature of documents related to our recruitment business,” said Audrey Bereszczynski, Payroll Project Manager at Page Personnel France. “Throughout the process, they have been incredibly receptive and flexible to our various needs.”

Today, Page Personnel France automates the sending of more than 7,000 mail pieces per month — over 10,000 pages — via standard and registered mail, with the majority containing multiple pages and joined documents like work contracts.

Increased productivity and reactivity

Esker has helped Page Personnel France achieve numerous benefits including:

- Fewer tasks related to mail processing, which has enabled existing staff to increase output without hiring extra personnel

(continued)

- Complimentary document archiving for up to two months for regular mail and three years for registered mail
- Improved quality and company image by eliminating the potential for mailing errors, which is particularly important for confidential documents
- Simplified the ability to track and locate mail, resulting in faster response times and more satisfied customers and temps

“Due to Esker, we are able to track our registered mail in real time and improve efficiency,” said Bereszczynski. “Online access to status details of each individual piece of mail is available at any time, and in the event of undelivered mail, a notification is fed back into the system.”

About Page Personnel
