

# Esker Shows How to Deliver More with Less – at the UK & Ireland SAP User Group Conference 2015

**Derby, UK — November 20, 2015** — [Esker](#), a worldwide leader in [document process automation solutions](#), and [SAP®](#) software solution and technology partner, is excited to announce its participation at this year's [UK & Ireland SAP User Group Conference](#), which will take place on the 22nd – 24th November 2015 at the ICC, Birmingham, UK.

We continue to support this conference each year due to the dedication to help SAP technical and business users, and the wider SAP community to expand their knowledge of the ever evolving capabilities available. During the conference Esker will demonstrate how uniquely their document automation solutions automate the flow of data and documents directly in SAP using a single, integrated point of support.

## Discovering an easy way to automate the end-to-end document process with SAP

Sam Townsend, Head of Marketing for Northern Europe at Esker, explains more: “We will be placing emphasis on our full suite of automation solutions compatible with an SAP environment which include: accounts payable, accounts receivable, sales order processing, fax and mail services. We’ll showcase how our solutions can help automate the end-to-end process of documents sent to and from SAP applications to enable quicker and more efficient ways of improving an organisations order-to-cash and purchase-to-pay cycles.

Townsend continued: During the conference we will demonstrate how easy it is to gain quick wins from streamlining very paper intensive manual processes within SAP applications and will provide information to anyone interested or tasked with driving down costs and improving departmental processes across the whole cash conversion cycle”.

## The Esker One Stop Shop: A Bespoke, End-to-End Solution

The conference is a platform where delegates can obtain answers to their Document Process Automation queries. Implementing automated solutions can be daunting; however, Esker can de-mystify the process and explain how easy and manageable it could be.

*(continued)*

Alistair Nicholas, Managing Director for Northern Europe at Esker, clarifies further: “For a business or department to suddenly go from mainly manual to entirely electronic processes may present huge challenges. However, Esker works with companies to deliver an individually tailored solution. So if the best starting point for the customer is 30% automation, progressing to, say, 60% before reaching 100% automation, then that is the kind of bespoke service we offer – which, in turn, delivers extra benefits for customers by providing real agility for business processes”.

We look forward to welcoming attendees to the Esker stand P2, where helpful, expert advice will be available on all aspects of document process automation, whether this is [Accounts Payable](#); [Accounts Receivable](#); [Sales Order Processing](#); or [Document Delivery](#). Esker experts will explain how Esker solutions work together with SAP to eliminate the manual processing of documents – to deliver added value.

## About Esker

Esker is a worldwide leader in document process automation solutions. Addressing all types of business processes, from accounts payable and accounts receivable to order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies around the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.

With 46.1 million euros in sales revenue in 2014, Esker operates in North America, Latin America, Europe and Asia Pacific with global headquarters in Lyon, France, and U.S. headquarters in Madison, Wisconsin. Esker is listed on the NYSE Alternext in Paris (Code ISIN FR0000035818).
