

Esker Introduces a New Way to Kick The Habit!

Leader in document process automation solutions for SAP run organisations announces an easy way to 'Kick The Habit' of using paper-based document processes.

Derby, UK – October 31, 2008 – Esker Ltd., the leader in document process automation solutions, today announced its participation at this year's SAP UK & Ireland User Group Conference, taking place on November 10th – 11th 2008 at Novotel, London West, One Shortlands, London, UK.

At booth #13, Esker will demonstrate its SAP-certified solutions that enable organisations to “Kick The Habit” of their paper-based document processes by automating the flow of documents into and out of existing SAP applications, thus eliminating the need for slow and costly manual processing.

In addition to exhibiting at the conference, Esker will have Jason Howell, Customer Service Development & Operations Manager from ED&S, a Honeywell Business present a customer's perspective on how they cured their addiction to paper-based document processes, allowing them to improve its Sales Order Process by 400% by eliminating 98% of paper from document processes.

As an SAP Software Partner with certified integration, Esker provides hundreds of enterprises world-wide with advanced capabilities for automating business processes by delivering documents directly to and from SAP solutions. This successful track record has helped Esker become a widely recognised document process automation solution among users of SAP solutions.

By leveraging solutions from Esker to achieve sales order and accounts payable process automation for SAP solutions, any sales orders and invoice payments coming in via fax, email or post are recognised regardless of layout, and data is intelligently extracted and made available within the SAP solution for further processing and retrieval.

As a result of the automation, there is no need for manual keying of data, which reduces the number of errors. Additionally, there is no need for multiple internal copies of documents; users print out fewer documents and thus use less paper. As a result, manual document processing is eliminated and order-to-cash and procure-to-pay cycles are accelerated.

Esker will again be showcasing Mail and Fax Services for SAP applications, the latest additions to its family of Esker on Demand document automation services. These SaaS (Software as a Service) solutions offer users the ability to send postal mail and faxes from their SAP application without any software investment.

Customers submit documents from any SAP module to the Esker on Demand facility, which are then faxed or processed for delivery via the postal service on the same day. These services integrate seamlessly with SAP and require no minimum output volume.

“We’ve been helping SAP run organisations reduce their usage of paper-based documents for years – plenty of businesses have long been eager to recapture the revenue they lose, errors they make and the time they waste through over dependence on paper and the processes involved with it,” said James Elkington, Managing Director of Esker Northern Europe. “

Elkington concludes; “The SAP UK & Ireland User Group Conference is the perfect venue for us to share our success stories from SAP users who have already implemented our solutions to eliminate manual processes, reduce costs and ultimately ‘Kick The Habit’ of using paper-based document processes. We’re eager to meet with attendees and show them how our solutions work and allow them to understand first-hand how SAP run organisations world-wide use our solutions to automate their document delivery processes.” For organisations who wish to ‘Kick The Habit’ of paper-based document processing just visit www.quitpaper.co.uk

About Esker

Esker is a recognised leader in helping organisations eliminate manual processes, gain process visibility and control, and reduce the use of paper by automating the flow of documents into, within and out of the organisation.
