

STAR MEDIA GROUP INCREASING EFFICIENCY WITH ACCOUNTS PAYABLE AUTOMATION

BACKGROUND

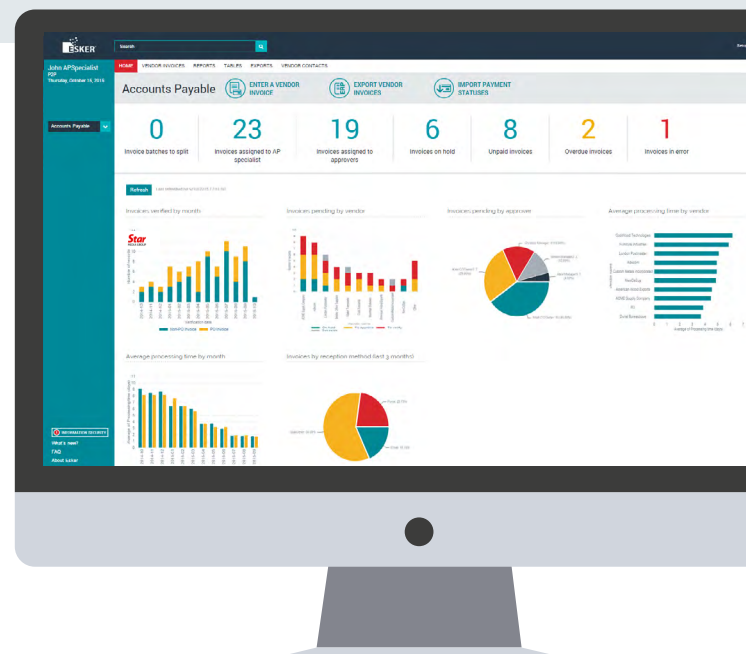

Star Media Group is one of the leading news and multi-channel media groups in Malaysia. Given the high volume of monthly supplier invoices received, the company was facing numerous challenges, including:

- Decentralisation of documents
- Lack of invoice visibility
- Increased manual processing resulting in inconsistency in the accounts payable (AP) process
- Delays in invoice processing due to insufficient information gathering
- Time-consuming manual verification with vendors and internal colleagues

SOLUTION

Star Media Group selected Esker's cloud-based Accounts Payable automation solution to address these issues.

Seamlessly integrated with its SAP® system, Esker's Accounts Payable solution has eliminated manual touch points in Star Media Group's AP process, centralised invoice approvals and provided greater process visibility.

"The visibility and accountability Esker has delivered is invaluable. Custom dashboards help us assess our process and allow us to better communicate and collaborate. And now, even if somebody is out of the office, invoice approvals can be done anytime, anywhere with Esker's mobile application."

Cindy Gee | Assistant GM | Finance Shared Services

BENEFITS

Thanks to Esker, Star Media Group has achieved numerous benefits, including:

50% faster invoice processing and increased efficiency thanks to automatic data capture

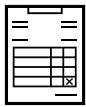

Greater visibility; documents are tracked and available in a single interface

Web-based solution outside the ERP system simplifies procedures and facilitates work with different departments

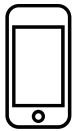

Improved alignment of internal processes

Centralisation of all documents helps its shared services centre work more efficiently

Single solution interface on one platform makes it easier to use and meets different user needs

Reduced need to chase approvers thanks to **on-the-go invoice review and approval capabilities** with Esker's mobile application, Esker Anywhere™

Improved communication with different entities and vendors via the portal

"Our daily invoice processing productivity has improved as all invoices are processed on one platform. With full visibility we are able to check on invoice status in real time. Esker has significantly reduced a lot of the manual work, including searching for physical documents which took up a lot of our time."

Assistant Manager | Purchase-to-Pay & Record-to-Reporting
