

HOW TO SUCCESSFULLY PUT IN PLACE AN E-INVOICING PROJECT

BEFORE YEAR 2000

there were less than 15 specialised e-invoicing service providers worldwide.

BUT TODAY,

the number of network operators has reached 1,500.

- > E-invoicing is a rapidly expanding technology. Estimated to grow from €3.3bn in 2017 to €16.1bn by 2024.
- > Digital transformation is no longer an option, it's the imperative.

"KEY RECOMMENDATION TO START AN E-INVOICING PROJECT IS TO CHANGE FROM A REACTIVE TO A PROACTIVE APPROACH."

"E-INVOICING ONLY WORKS IF ALL TRADING PARTNERS ALSO SUPPORT E-INVOICING."

Many organisations require up-to-date information to select the right solution to automate their invoice process but are unsure of where to source this.

ALL YOU NEED TO KNOW ABOUT E-INVOICING IN 1 MARKET REPORT

Written by an independent international e-invoicing consultant and market analyst, the 2017 Billentis E-invoicing Report supports invoice issuers and recipients wishing to replace expensive paper-based invoice management. The comprehensive report provides relevant information for succeeding with an e-invoicing project.
